Communications on PURE AND APPLIED MATHEMATICS

A JOURNAL ISSUED BY
THE COURANT INSTITUTE OF MATHEMATICAL SCIENCES
NEW YORK UNIVERSITY

VOLUME XLV • 1992

Issued by the Courant Institute of Mathematical Sciences
Founded by Richard Courant
with Kurt O. Friedrichs, Fritz John, and James J. Stoker
Managing Editors: Natascha A. Brunswick, Will Klump, Louis Nirenberg
Editorial Board: Marsha J. Berger, Sylvain E. Cappell, Martin D. Davis,
Jonathan B. Goodman, Fang-Hua Lin, Cathleen S. Morawetz, Charles S. Peskin

An Interscience® Publication
Published by JOHN WILEY & SONS
New York-Chichester-Brisbane-Toronto-Singapore

© 1992 by John Wiley & Sons, Inc.

The journal publishes papers originating at or solicited by the Courant Institute of Mathematical Sciences of New York University. . It is devoted mainly to contributions in the fields of applied mathematics and mathematical physics and mathematical analysis.

Many of these papers are technical reports of the research performed under contract or grant from various research agencies of the United States Government; in such cases, reproduction in whole or in part is permitted for any official purpose of the United States Government.

Communications on Pure and Applied Mathematics (ISSN: 0010-3640) is published in eight issues by John Wiley & Sons, Inc., 605 Third Avenue, New York, New York, 10158. Copyright © 1992 by John Wiley & Sons, Inc. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 and 108 of the United States Copyright Law without the permission of the copyright holder is unlawful. Second-class postage paid at New York, NY and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright holder's consent that copies may be made for personal or internal use or for the personal or internal use of specific clients on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the United States Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.

Subscription price (1992): $550.00 per volume. Outside the U.S.A.: $675.00 (air service and handling included). Subscription correspondence should be sent to Susan Malawski, Fulfillment Manager, Subscription Department, John Wiley & Sons, 605 Third Avenue, New York, NY 10158. Back volumes, microfilm, microfiche are available for previous years. Request price list from publisher. Please allow four weeks for processing a change of address. For subscription inquiries, please call customer service at (212) 850-6645 or write to the above address.

The contents of this journal are indexed in: *Applied Mechanics Reviews, CompuMath, Current Contents/ Physical, Chemical and Earth Sciences, Mathematical Reviews,* and *Science Citation Index.*

Postmaster: Send address changes to *Communications on Pure and Applied Mathematics,* Subscription Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

Claims for undelivered copies will only be accepted after the following issue has been received. Please enclose a mailing label or cite your subscriber reference number in order to expedite handling. Missing copies will be supplied when losses have been sustained in transit and where reserve stock will permit.

Editorial Production, John Wiley: Sheila Kaminsky

This journal is printed on acid-free paper.

Communications on
PURE AND APPLIED MATHEMATICS

Contents of Volume XLV, Nos. 1–10, 1992

NUMBER, 1, JANUARY

Averaging Regularity Results for PDEs Under Transversality Assumptions
P. Gérard and F. Golse 1

On the Regularity Theory of Fully Nonlinear Parabolic Equations: I
L. Wang 27

Regularity for Quasilinear Second-Order Subelliptic Equations
C.-J. Xu 77

Large Deviation Problem for Some Parabolic Itô Equations
P.-L. Chow 97

Removal of Boundary Singularities of Pseudo-Holomorphic Curves with Lagrangian Boundary Conditions
Y.-G. Oh 121

NUMBER 2, FEBRUARY

On the Regularity Theory of Fully Nonlinear Parabolic Equations: II
L. Wang 141

Translation Representation for Automorphic Solutions of the Wave Equation in Non-Euclidean Spaces, IV
P. D. Lax and R. S. Phillips 179

On Uniqueness and Continuation Properties after Blow-Up Time of Self-Similar Solutions of Nonlinear Schrödinger Equation with Critical Exponent and Critical Mass
F. Merle 203

NUMBER 3, MARCH

On the Regularity Theory of Fully Nonlinear Parabolic Equations: III
L. Wang 255

Solution of a Nonlinear Heat Equation with Arbitrarily Given Blow-Up Points
F. Merle 263

Homogenization of Linear and Nonlinear Transport Equations
Weinan E 301

Justification of the Two-Dimensional Equations of a Linearly Elastic Shallow Shell
P. G. Ciarlet and B. Miara 327

NUMBER 4, APRIL

Stability of Viscous Shock Waves Associated with a System of Nonstrictly Hyperbolic Conservation Laws
T.-P. Liu and Z. Xin 361

Geometry of KDV (3): Determinants and Unimodular Isospectral Flows
H. P. McKean 389

Axially Symmetric Harmonic Maps Minimizing a Relaxed Energy
R. Hardt, F.-H. Lin, and C.-C. Poon 417

Stationary Points of the Yang-Mills Action
L. Sadun and J. Segert 461

NUMBER 5, JUNE

Biorthogonal Bases of Compactly Supported Wavelets
A. Cohen, I. Daubechies, and J.-C. Feauveau 485

Dynamical Stability and Vanishing Viscosity: A Case Study of a Non-Strictly Hyperbolic System
H. Freistühler 561

The Weinstein Conjecture in the Presence of Holomorphic Spheres
H. Hofer and C. Viterbo 583

NUMBER 6, JULY

Diffusion of Color in the Simple Exclusion Process
J. Quastel 623

Commutativity of Invariant Differential Operators on Nilpotent Homogeneous Spaces with Finite Multiplicity
L. Corwin and F. P. Greenleaf 681

Regularity for the Wave Equation with a Critical Nonlinearity
M. G. Grillakis 749

NUMBER 7, AUGUST

Generalizations of the Neumann System—A Curve Theoretical Approach Part III: Order n Systems
R. J. Schilling 775

Refined Asymptotics for the Blowup of $u_t - \Delta u = u^p$
S. Filippas and R. V. Kohn 821

A Minimization Problem Involving Variation of the Domain
B. Dacorogna and I. Fonseca 871

Asymptotic Symmetry of Solutions of Nonlinear Partial Differential Equations
M. Badiale and M. Bardi 899

NUMBER 8, SEPTEMBER

On the Stability of Finite Element Methods for Shock Waves
A. Szepessy 923

Regularity of Harmonic Maps from the Minkowski Space into Rotationally Symmetric Manifolds
J. Shatah and A. Tahvildar-Zadeh 947

Resonance and Long Time Existence for the Quadratic Semilinear Schrödinger Equation
S. Cohn 973

The Yamabe Flow on Locally Conformally Flat Manifolds with Positive Ricci Curvature
B. Chow 1003

Dirichlet and Neumann Boundary Value Problems for Yang-Mills Connections
A. Marini 1015

Boundary Value Problems for Surfaces of Constant Gauss Curvature
D. Hoffman, H. Rosenberg, and J. Spruck 1051

NUMBER 9, OCTOBER

Global Solutions of Nonlinear Wave Equations
H. Lindblad 1063

Phase Transitions and Generalized Motion by Mean Curvature
L. C. Evans, H. M. Soner, and P. E. Souganidis 1097

The Shock Generation Problem for a Discrete Gas with Short-Range Repulsive Forces
J. M. Greenberg 1125

Boundary Regularity of Maps with Convex Potentials
L. A. Caffarelli 1141

On the Stability and Instability of Positive Steady States of a Semilinear Heat Equation in $\mathbb{R}^n$
C. Gui, W.-M. Ni and X. Wang 1153

The Stationary Axisymmetric Two-Body Problem in General Relativity
G. Weinstein 1183

Solutions of Superlinear Elliptic Equations and their Morse Indices
A. Bahri and P. L. Lions 1205

NUMBER 10, DECEMBER

Homoclinic Type Solutions for a Semilinear Elliptic PDE on $\mathbb{R}^n$
V. C. Zelati and P. H. Rabinowitz 1217

Travelling Waves for Planar Flames with Complex Chemistry Reaction Network
A. Bonnet 1271

Morse Theory for Periodic Solutions of Hamiltonian Systems and the Maslov Index
D. Salamon and E. Zehnder 1303

Author Index 1361

Volume Contents 1365
